AJAX and CORS API

getText(url, success);

getJson(url, success);

ajax(Options object);

Options object properties (* = default value):

Property	Value
url	string
data	string
queryType	*"ajax"/"cors"
type	*"get"/"post"
success	function
error	function
format	*"text"/"json"/"xml"
user	string
password	string

Cookie API

```
getCookie([name]);
hasCookie(name);
setCookie(Options object: properties are the same as the parameters);
setCookie(name, value[, hours=8760[, path="/"[, domain[, secure[, SameSite="Lax"[, HttpOnly]]]]]]);
removeCookie(Options object: properties are the same as the parameters);
removeCookie(name[, path="/"[, domain[, secure[, SameSite="Lax"[, HttpOnly]]]]]);
clearCookies(Options object: properties are the same as the parameters);
clearCookies([path="/"[, domain[, sec[, SameSite="Lax"[, HttpOnly]]]]]);
```
